VersaTrans Solutions, Inc. Earns User Accolades

Company's product offerings earn an eSchool News Readers' Choice Award

Albany, NY - January 9, 2006 – VersaTrans Solutions, Inc. has been voted a Readers' Choice Award winner in the 2006 Readers' Choice Awards Program conducted by eSchool News. The program invited eSchool News readers to vote for their top choices in eight different categories of school management software, and more than 600 readers responded, voting for their favorites.

In the 'Best Transportation Management System' category, the robust VersaTrans suite of products, including VersaTrans FleetVision® (a fleet maintenance tracking system), VersaTrans TripTracker® (a field trip tracking solution) and VersaTrans RP™ (a comprehensive routing and planning solution) was ranked second overall among all available school transportation management systems. VersaTrans' suite of products also includes VersaTrans OnScreen™ (an AVL/GPS tracking solution), VersaTrans e-Link® (a Web-based transportation information inquiry and maintenance application), and VersaTrans SIF Agent™ (an application that facilitates the exchange of information between VersaTrans RP and other Schools Interoperability Framework (SIF) certified information management systems).

Respondents cited ease of use as a top reason for voting for VersaTrans' products. One VersaTrans customer described VersaTrans' products as "easily navigated and user-friendly." Another customer recognized VersaTrans' FleetVision product for its "uniqueness and ease of use for drivers as well as management."

About VersaTrans Solutions, Inc.

VersaTrans Solutions is a software and services provider to school districts in North America.
